SUMMARY

Motivated and curious B.E. Computer Science Engineering student specializing in the Internet Of Things (IoT). Seeking an opportunity to apply technical knowledge in embedded systems, sensor networks, and IoT-based product development. Strong foundation in problem-solving, teamwork, and basic programming. Eager to contribute to real-world projects and gain hands-on experience in innovative and practical environments.

PROJECTS

IOT based low cost fire, temperature and gas leakage monitoring system

June - July 2024

- Developed a low-cost IoT-based fire, temperature and gas leakage monitoring system using ESP32/Arduino.
- Interfaced sensors like MQ-2, MQ-5, DHT11/22 and flame sensors for real-time data monitoring and alerts.
- Implemented wireless communication and cloud-based logging using WiFi/Bluetooth and platforms like Blynk/Firebase.

Webcam-based Eye Blink Analysis for Screen-Induced Strain

December 2025

- Developed a real-time webcam-based eye blink analysis system using Python, OpenCV, and facial landmark detection techniques.
- Implemented Eye Aspect Ratio (EAR) algorithm to monitor blink frequency and detect screen-induced eye strain and fatigue.
- Designed a live alert system to notify users during prolonged screen exposure and reduced blinking activity.

AI-Driven predictive Industrial Safety

April 2026

- Developed an AI-driven predictive industrial safety system for real-time monitoring and hazard detection in workplace environments.
 - Implemented machine learning and sensor data analysis techniques to predict potential safety risks and generate automated alerts.
-

EDUCATION

Sri Saradha Vidhyala School

2020 - 2022

SSC - 72%

HSC - 78%

Bachelor of Engineering

Nov 2022 - May 2026

Saveetha Engineering college

B.E CSE(IOT)

ADDITIONAL INFORMATION

- **Technical Skills:** Python, Machine Learning, C Programming, Java
- **Languages:** English, Tamil
- **Non- Technical Skills:** Time management, Honesty, Communication, Teamwork
- **Certificate:** -Coursera-Introduction to Programming with MATLAB, Coursera-Computational Neuroscience, Coursera-Introduction to Public Speaking
